~~CONFIDENTIAL~~

Witness Statement:

Objects first looked like large stars. They seemed to be at a very great distance and appeared to be about the size of an ash tray. There were approximately six or seven of them in a formation that resembled the shape of the big dipper. Did not have a definite shape individually but just seemed to be a group of spots glittering in the sky. They were gold in color and seemed to be just hanging in the sky. The sky was clear and blue and the sun was shining but do not believe the gold color caused by a reflection of the sun.

Corroborated by truck driver but/^{witness} could not obtain his name.
