### Pilot Sights Small Flying Disc Chasing F-84 Over Japan

By the Associated Press

UNITED STATES AIR BASE, Northern Japan, Jan. 28.—The United States Air Force last night reported a small, metallic, disc-shaped object made a controlled, sweeping pass at an American jet fighter-bomber and was observed at very close range by another pilot.

The report, from Air Force intelligence files, said the sighting was made over Northern Japan at 11:20 a.m., March 29, 1952, by Lt. David C. Brigham of Rockford, Ill.

It was a bright, cloudless day. Lt. Brigham said he got a very good look at the object from about 30 to 50 feet for about 10 seconds.

The pilot described it as

“about eight inches in diameter, very thin, round, and as shiny as polished chromium; had no apparent projections and left no exhaust trails or vapor trails.”

He said it caught up with an F-84 Thunderjet, hovered a few moments and then shot out of sight. The F-84 pilot, whose name was not revealed, did not see it.

It was the second disclosure in a week by Air Force intelligence of mysterious flying objects over Northern Japan near the Russian-Siberia area.

On January 21, the Air Force disclosed that “rotating clusters of red, white and green lights” had been sighted over Northern Japan by American airmen.
