More About Saucers

**Priest Finds 'Whirring' Disc
In Yard and Holds It for FBI**

Chicago, July 6 (U.P.)—A Catholic priest at Grafton, Wis., said tonight that a round, metal disc, which might be one of the mysterious "flying saucers," had crashed into his parish yard and that he is holding it for the Federal Bureau of Investigation.

The Rev. Joseph Brasky of St. Joseph's Church at Grafton, 45 miles north of Milwaukee, said he heard a swishing and whirring noise this morning. A second later, he said, he heard a thud and a mild explosion.

He investigated and found a sheet metal disc about 18 inches in diameter, resembling a circular saw blade.

"The object still was warm, weighed about four or five pounds and was about one eighth of an inch thick," he said.

There was a hole about one inch in diameter in the middle of the disc, he said, and in the opening were "gadgets and some wires."

The priest said he did not know if his discovery were important or whether it might be an elaborate practical joke. He said he had notified the FBI of his find. H. K. Johnson of the Milwaukee

FBI office said he hadn't heard yet about the disc but that an official report might be at his office.

The flying discs have been reported "seen" by persons in 30 States, but Brasky's disc was the first one that actually had been found—if that is what was found.

His report came a few hours after a military plane made an unsuccessful speed dash in an attempt to track down one of the discs and the Army and scientists sought to ascertain whether coast-to-coast reports about the discs zooming through the sky were fact or fancy.

Army planes scoured the northwest Pacific skies for them without success today and one "eyewitness" even reported having seen one of the discs take off in Arizona. A St. Louis railroad man exhibited some paper "discs" he said he had seen floating over St. Louis.

The flying saucers which have been reported skimming through America's skies at speeds up to 1200 miles have eluded the usually keen eye of radar.
