Gentlemen;

Flying Discs

Recently I have heard and read about reports of disc-shaped aircraft, or whatever they are, in our western regions. They reminded me of a nearly forgotten incident in Germany, after the war. I report this to you because I feel this may be of international scope.

My buddy and I went on pass to see a friend of his. One evening the three of us were driving along some back roads when I sighted a strange looking object in the sky from eight to ten miles to our front and approximately 5,000 feet high.

I immediately stopped the jeep for a better look. The object rapidly came toward us, descending slowly. About a mile away it stopped its horizontal motion but continued a slow oscillating descent, similar to a descending parachute. Then suddenly it dropped in a spiral motion.

Immediately I drove over to where it had dropped. It took almost five minutes to reach the place but we saw nothing. After ten minutes of cruising around the area it became too dark to see so we went back to town.

because
I am not sure my companions saw this, it happened so quickly it could easily have been missed, but I described what I had seen so vividly that they were as excited as I was. My first impression was that it was a cloud, but it was traveling at right angles to the wind.

The local of this incident was approximately 20 miles north-west of Habberbishopsheim. If necessary, I will swear to the authenticity of this and to the shape of the object.

Sincerely Yours,

Robert J. Sroka
