Re: There follows the report of the FBI Laboratory on the examination  
of evidence received from your office on September 17, 1948. *J. Edgar Hoover*  
John Edgar Hoover, Director

YOUR FILE NO.  
FBI FILE NO.  
LAB. NO.

Examination requested by: **Examination of Soil**

Reference:

Examination requested:

RECORDED - 98 62-83894 -146  
PC-23142 CO

Specimens: **Addresses**

Letter dated September 9, 1948

Microscopic (Petrographic-Geologic)

Q1 Sample of soil.

Results of Examination:

The sample of soil designated as specimen Q1 consisted of various sized pebbles, sand and dirt. This material was examined for the presence of unusual elements or alloys adhering to the surface of the particles, evidence of intense heat and radioactive substances.

Nothing unusual was noted on the pebbles or in the sand and dirt that would indicate a metallic object had rubbed or scraped against this sample. No abnormality was noted in the structure of the various pebbles and rocks, nor was there any indication of extreme heat or the presence of radioactive substances.

The specimen designated as Q1 will be returned to your office under separate cover by registered mail.
