

DIRECTOR, FBI

March 22, 1949

It was brought out that since December 5, 1948 there have been more than ten incidents analagous to the "green fireball" above described and some twenty others with minor deviations from the above. It is also pointed out that the only sitings which had occurred seemed to have been confined to the Los Alamos, Las Vegas, and West Texas triangle.

G-2 also advised that as of November 1, 1948, information had been received from higher Military authorities that the Air Force had advised that such sitings occur periodically and that another period of sitings was then imminent. Further, on February 14, 1949, higher Military authorities advised that it was believed that ultimately it would be found that the phenomena in question have a natural explanation.

It is further noted that about 7:30 p.m., March 6, 1949, what was at first thought to be a flare was seen approximately one-half mile north of Killeen Base in the area of the Vital Installation at Camp Hood, Texas, and a second flare was noticed at 1:45 a.m., March 7, 1949, approximately three miles from Killeen Base. It has since been concluded that the flares seen near Killeen are probably similar to the phenomena previously noted in the Los Alamos, Sandia Base Area although these are the first sitings of such phenomena near Camp Hood.

There appears to be reason to believe that the above-mentioned phenomena may be connected with secret experiments being conducted by some U.S. Government Agency as it is believed that the United States is farther advanced in guided missile development than any foreign power.

Although the primary responsibility for investigating such matters is now with the U.S. A.F. Air Materiel Command, G-2, 4th Army is still interested in being advised of any further sitings of such phenomena which might be observed.
