 RE: FLYING DISCS

Your attention is directed to Bureau Bulletin #57, Series 1947, dated October 1, 1947, relating to the discontinuance of investigation by this Bureau in matters concerning flying discs.

For your confidential information, a reliable and confidential source has advised the Bureau that flying discs are believed to be man-made missiles rather than natural phenomenon. It has also been determined that for approximately the past four years the USSR has been engaged in experimentation on an unknown type of flying disc.

The Department of the Air Force has furnished to the Bureau the attached memorandum classified "restricted" dated February 15, 1949, entitled "Unconventional Aircraft." This memorandum is being furnished to you in order that all agents assigned to your office can be informed of the type of information desired by the Air Force in this matter.

As set forth in Bureau Bulletin #57, referred to above, no investigation should be conducted by your office relative to flying discs, however, the attached memorandum should be referred to in securing data from persons who desire to voluntarily furnish information to your office relating to flying discs.

Very truly yours,

John Edgar Hoover

Director
