

5- I do not believe this is "horse feathers" so much as I did in the drawings sent you sat. Ubaltsky said on the snow with runners on this saucer like a sled centrifugal force will pull her at a hell of a speed. The jets are used on take off there is wheels on the saucer there are 3 wheels they are pulled up into places in the saucer from the inside and some how or other a piece covers the spot on the outside the drawing shows that but I cannot figure out how it's done from the inside of the saucer. Now I believe this is all the dope I can give you on them. Ubaltsky said the big saucers are oblong fore and aft but round in the middle - just as the round saucers are something like this. you know what I mean only I cannot draw it.

I will mail this from Utiyah monday 10th 1950 and trust you will put this into the right hands
