FLYING DISCS

AARON L. HITCHENS, INFORMANT

The following is being brought to the attention of the Bureau so that it may be referred to the Department of the Air Force in connection with instructions set forth in SAC Letter No. 38, Series 1949, dated March 25, 1949.

Mr. AARON L. HITCHENS, Chemical Engineer in charge of the Chemical and Physical Laboratories of the Winchester Repeating Arms Co., 275 Winchester Avenue, New Haven, was interviewed in connection with other official business and furnished the following information:

He advised that on Friday, October 20, 1950, he and his wife and daughter, who reside at 495 Edgewood Avenue, New Haven, went out of the back door of their home to the back yard at approximately 6:15 P.M. His little daughter called his attention to a star in the sky that was moving and Mr. HITCHENS noted a sphere-like object directly overhead which gave a steady golden orange glow. He stated that this object was very high between ten to twenty thousand feet, possibly higher. The glow given off was very steady and not blinking and the whole sphere itself glowed in about the same consistency. He witnessed this object for approximately twenty seconds during which time it traveled in a westerly direction toward New York City and then when Mr. HITCHENS believed that possibly it was near or over New York City, it then veered in a southerly direction as if crossing Long Island or possibly in such a direction that it might have been traveling over Long Island. He lost sight of this object as it disappeared behind trees in his vicinity. He advised that as to the size of the object, it was approximately ten times the diameter of Venus, which was shining very brightly that night. He states it was a very clear night and that all the stars in the sky were twinkling as compared to the steadiness of the glow given off by this object. He advised that the object did not appear to diminish in size as it traveled farther away from him but appeared to maintain about the same size as when he first noticed it directly overhead. The same steady orange glow persisted during the entire time that he witnessed it. Although this object was actually cut from his sight by nearby trees, Mr. HITCHENS states that it was so far away from him any way that he probably would have lost sight of it very shortly due to distance had the trees not intervened. The object made no sound whatsoever
