Dear sir,

I would like to submit a theory that may lead to a solution of what the Flying saucers really are—these objects could be Lights. caused by Radio Television Beams illuminating moist vapor, not unlike phosphorus on rain soaked wood in certain seasons—the northern lights "aurora Borealis" have manifested themselves for years, setting up Electro magnetism & Earth potential which distorts normal Telegraph Communications. The lights are somewhat like a Fan & can be seen as far south as Equator—

It is my opinion that Flying Saucers are Electrically induced currents onto a space (small clouds) and causing it to glow—this cloud being charged Electrically and a magnetic polarity being same as the interceptor it can never be overtaken, and would if pursued gradually grow Dimmer & disappear giving the impression that it out distanced the pursuer with a great Burst of speed.

This is submitted as a theory as I do not have the power or facilities to prove or disprove. But I submit a suggestion whereby a test could be made.

When these saucers appear again Have the TV & all Broadcasts silenced from the air and check for results—this may not change immediately, as other Elements in this Build up can not be turned off or on at a given signal.

However I firmly believe that, if the idea as set forth in my crude way is submitted to more learned persons then I some solution is inevitable.

/s/ Dewey T. Wilson
