

From detailed study of reports selected for their impression of veracity and reliability, several conclusions have been formed:

(a) This "flying saucer" situation is not all imaginary or seeing too much in some natural phenomenon. Something is really flying around.

(b) Lack of topside inquiries, when compared to the prompt and demanding inquiries that have originated topside upon former events, give more than ordinary weight to the possibility that this is a domestic project, about which the President, etc. know.

(c) Whatever the objects are, this much can be said of their physical appearance:

1. The surface of these objects is metallic, indicating a metallic skin, at least.

2. When a trail is observed, it is lightly colored, a Blue-Brown haze, that is similar to a rocket engine's exhaust. Contrary to a rocket of the solid type, one observation indicates that the fuel may be throttled which would indicate a liquid rocket engine.

3. As to shape, all observations state that the object is circular or at least elliptical, flat on the bottom and slightly domed on the top. The size estimates place it somewhere near the size of a C-54 or a Constellation.

4. Some reports describe two tabs, located at the rear and symmetrical about the ~~line~~ axis of flight motion.

5. Flights have been reported, from three to nine of them, flying good formation on each other, with speeds always above 300 knots.

6. The discs oscillate laterally while flying along, which could be snaking.
