

UNIDENTIFIED FLYING OBJECT

Noise was a roar, not a blast. Not like a jet. Changed from high frequency to low frequency and then stopped. Roar lasted possibly ten seconds--was going towards it at that time on the rough gravel road. Saw flame about as long as heard the sound. Flame same color as best as recall. Sound distinctly from high to low until it disappeared. Both car windows were down. No other spectators noted--no traffic except the car in front--and car in front might have heard it but possibly did not see it because car in front was too close to hill in front, to see the flame.

After the roar and flame, did not note anything, while going up the somewhat steep rough hill toward the flame site. Got up about half way first time, wheels started skidding, roar still going on, had to back down and try twice again before made the hill. Hill about sixty feet long, fairly steep and with loose gravel and rock. While beginning third time, noise and flame not noted.

After got to top, traveled slowly on the gravel road westwardly. Noted nothing for awhile, for possibly ten or fifteen seconds, went slow, looking around for the dynamite shack--did not recall exactly where the dynamite shack was.
