

# 1.4(a)

CURRENT CLASSIFICATION ~~S//NF~~-REQUESTED CLASSIFICATION UNCLASSIFIED

**Reported Appearance:** An individual reported observing a large blue featureless triangular object with a solid, unwavering silhouette emitting powerful "whitish blue" light from multiple points along its perimeter.

**Reported Behavior:** The reporter described the object as "hovering" stationary above or near a national security facility for approximately three minutes. They then reported observing it move to a position higher in their field of view. The reporter characterized the object's motion as "backing up" in a "jerking" or "jumping" manner inconsistent with "smooth" jet propulsion. The individual reported that they observed the object for approximately eight minutes.

**Other Observations:** The reporter commented that they could not discern whether or how the object was controlled, could not identify its means of propulsion, and could not determine whether it had a defined "front or rear." They stated that they "didn't think" the object was a drone.

The reporter also commented on behaviors and capabilities they did not directly observe. They stated that the object did not seem to travel along a defined flight path, possess any "photograph or data collection capabilities," emit a "vapor trail," or demonstrate "cloaking capabilities."

**Event Summary:**

**Location:** Pacific Time Zone

**Date:** March 2023

**Time of Day:** Night

**Duration:** Approx. 8 minutes

**Reporter Type:** Civilian

**Obtained by:** Personal cellular device

**Reported Characteristics:**

**Altitude:** Not reported
