

Tape 47/14

And I'll just confirm that the - that disturbance over the So - Solomon Islands is an awfully tightly wound little storm system. And right now, I finally have see New Zealand for the first time in a couple of days, for sure. And the South Island's got some, probably high cirrus over it. North Island looks pretty clear. That's the end that I can get right now.

CC Roger. We saw you looking at Regulus there; we didn't realize you were looking at the Earth instead.

LMP Ron's been looking for the booster. And he called me down and asked me to look at the Earth. He's been holding out on me.

CC Roger.

LMP Pass the torch of weather forecasting to Ron.

02 20 55 22 CC Hey, Jack. I also have some words for you and Gene. Got some advice from the home front. The thing to do with Ron in the future is to hook up a Baby Ben and a metal dishpan. It works every time, if you want to wake him up.

CMP No. I think that's not a good way.

CC Ron, everybody's fine over at El Lago. They are doing great. Listening to every word.

CMP Very good, Bob. Thank you very much.

CDR Hey, Bob. We got two of those flashers out there. They could be SLA panels. I don't know. They're alike in intensity and pretty regular in the - in the intensity, bright and dim flashes they come out with, and they're widely separated. One is about the position we called at the first time; the other one is - oh, as I'm looking at the Earth, far to the left. Closer to the center window now.

02 20 56 52 CC Roger.

02 21 01 07 LMP Houston, 17.
