

Tape 47/16

02 21 04 23 CC Roger, Jack. The Solomon Islands disturbance and everything is confirmed on this chart that I've got. It's very definitely confirmed in there.

LMP Okay. Well, it's a lot more obvious today than it was yesterday; but even then it was showing pretty strong circulation. It is starting to wrap up, look very much like Therese did yesterday.

CC Roger. I'm sure of that. The one right off of Vietnam is also pretty tight, isn't it still?

LMP Well, we can't see that one yet.

CC Okay.

LMP Australia in general is still very clear except in the northeastern portions where it looks like they have got scattered clouds; but it looks like a pretty night - over Australia.

CC Roger. Looks that way from the satellite photo from the last couple days. Looks pretty nice down there.

02 21 05 34 LMP Right.

02 21 07 05 CC Jack, in looking at the sequence reports for Hickam and Hilo and that area, it looks like they just got their standard 3500 scattered, 4500 broken clouds, maybe a rain shower or two. But just their standard tropical fluffy clouds.
