6-39

ALDRIN

Sometimes a minute or two would go by and then you'd see the two within the space of 10 seconds. On an average, I'd say just as a guess it was maybe something like one a minute. Certainly more than enough to convince you that it wasn't an optical illusion. It did give you a rather funny feeling to contemplate that something was zapping through the cabin. There wasn't anything you could do about it.

ARMSTRONG

It could be something like Buzz suggested. Mainly a neutron or some kind of an atomic particle that would be in the visible spectrum.
